

ICE – Suggested Readings for Journal Entries due in July 2014.

How has the internationalisation of capital influenced the financial institutions of an economy of your choice?

http://globalautonomy.ca/global1/glossary_entry.jsp?id=CO.0058 – bit heavy but it outlines some of the essentials

<http://homepages.warwick.ac.uk/~syrbe/pubs/paris.pdf> - might help with some of the basics.

http://www.oecd-ilibrary.org/science-and-technology/the-internationalisation-of-venture-capital-activity-in-oecd-countries_084236411045 - might be a bit technical.

<http://www.cpsa-acsp.ca/papers-2005/Oguz.pdf> - if time allows it's worth a quick read.

<http://monthlyreview.org/2011/06/01/the-internationalization-of-monopoly-capital> - precise and has some interesting data.

Focus on localisation – more beneficial for the citizen?

http://www.fairtrade.org.uk/what_is_fairtrade/faqs.aspx - often part of the considerations involving this aspect of development.

http://www.procurementcupboard.org/Files/trade_local_case_studies-2.pdf - though set in London the micro and macro observations have some relevance to the developing world.

http://ec.europa.eu/trade/policy/countries-and-regions/development/economic-partnerships/index_en.htm - another big player in this area of development

<http://www.developmentgap.org/> - some progressive thinking and examples.

<http://www.ustda.gov/makinggloballocal/MGLFactSheet.pdf> - another site where some examples can be found.

The impact of sustainable thinking

http://cmsdata.iucn.org/downloads/iucn_future_of_sustainability.pdf - what's it all about?

<http://www.sustainability.com/thinking> - a wide-ranging basic site.

<http://www.celsias.com/article/power-sustainable-thinking-5-d-stages-change/> - sorry climate change again.

<http://sustainabilitythinking.com/> - now it's water.

I have invited Rolf to join us via Skype on 4th July. If today (4th June) is a guide the internet in Zambia is VERY slow. This is a Trust he runs and I am a Trustee of.
